

This Man Worries for Women

DON'T worry whether or not the oven of your modern gas range will bake to perfection. The man shown in the photograph did the worrying for you before he would approve the range. He is not a chef as you might suppose—but a technologist making tests at The American Gas Association Laboratory at Cleveland, Ohio.

Baking cookies is one of his jobs.

If the cookies, thin and sensitive to fine shades of temperatures, have baked evenly and uniformly in every corner of the oven after eleven minutes in a temperature of 375 degrees Fahrenheit, they have proven the oven heat distribution is satisfactory. Should one cookie come out less than crisp and golden, the range is considered a baking failure and is turned down.

CAROLINA FARMER DEGREE AWARDED ENOCH DICKENS

Aurelian Springs Boy Gets Highest Tar Heel Honors

By E. K. VEACH, Aurelian Springs Agricultural Teacher

Enoch Dickens, of the Aurelian Springs Young Tar Heel Farmer Chapter, on July 2nd, received the high honor of the Carolina Farmer Degree by the State Young Tar Heel Association of the Future Farmers of America. He completed his high school career in 1935, but due to not having the State Convention last year he did not receive a degree at that time. Out of 9,382 students in Vocational Agriculture in North Carolina during the year 1935, there were eighteen receiving the degree of Carolina Farmer.

The Carolina Farmer Degree stands for achievements in an agricultural student's farm projects, his high school, and the Young Tar Heel Farmers Club. It also stands for thrift, stamina and leadership. Last, but not least, this degree stands especially for scholarship. In other words, an agricultural student who comes up to the standards of the Carolina Farmers Degree is a "topnotcher" in his school, community and agricultural department.

Enoch has done outstanding supervised practice work during his high school career taking the four years on the average. When in the eighth grade he had eight acres of peanuts for a project with a labor income of \$42.71. In the ninth grade he had seven acres peanuts for a project with a labor income of \$112.84. In the tenth grade he became very much in-

terested in making the Carolina Farmer Degree. He carried four projects that year to raise the standard of his supervised practice work. They were as follows: (1) 6 acres corn; (2) 6 acres cotton; (3) 4 acres peanuts; and (4) 300 for the four projects of \$721.43. The baby chicks, with a labor income total labor income for his six projects was \$876.98. He carried four projects for his eleventh grade work which were not needed for him to qualify for the Degree of Carolina Farmer, but were carried to complete a four years supervised practice program.

Enoch was very active in Young Tar Heel Farmer work. He was ready and willing at all times to help push the work of the Chapter along. By keeping posted on the current happenings of Young Tar Heel Farmer work, he did not wait to be told the things that should be done, but went ahead and did them on his own initiative.

He served on a number of important committees in club work, represented the club in a district livestock judging contest two different times, and was vice-president of our Young Tar Heel Farmer Club. He had an average grade of 85 on all of his high school work. He could lead a discussion when placed in charge of group, either in club work or classroom.

This achievement is an honor for Enoch; it is an honor for the club; it is an honor for the school and community; and cannot be praised too highly. Since Enoch is the only member of our club to receive this degree during the eight years it has been organized, we should set this achievement as a goal for the present and future members to work toward. Remember, club members, this honor is attained by special effort on your part thru activities.
